Outcome: >90% of ACL's performed as day case; postop pain and nausea a problem

R Woollam, AJ Barnett, CR Evans, BJ Burston
Title: Best Practice Tariff for Fractured Neck of Femur Patients
Aim: determine how often we are achieving best practice tariff for fracture NOF patients
Outcome: huge shortfall in number of patients achieving tariff

A Papachristos, G Kanes, PD Gallacher, AJ Barnett, SN Roberts
Title: Management of acute ACL injuries
Aim: Identify whether or not we are reconstructing ruptured ACL within 3 month guideline
Outcome: >90% patients undergoing surgery within 3 months; > 95% patients as day case

Murphy & AJ Barnett
Title: Audit of trauma meeting patient proforma
Aim: compare current admission proforma completion with agreed standard.
Outcome: poor compliance completing proformas. Implemented change and are currently re-auditing.

AJ Barnett, T Woodacre, D Searle, A Thomas, V Mandalia, A Toms
Title: audit of surgical site infection following total knee replacement.
Aim: compare the incidence of postoperative surgical site infection with national standard.
Outcome: Highlighted an apparent increase in surgical site infection and has led to change in practice.

J Neely, AJ Barnett, Ruy da Assuncao, H Pandit
Title: patient information recall following knee arthroscopy.
Aim: identify amount of information recalled by patients following knee arthroscopy.
Outcome: demonstrated poor information recall; patients to be sent letter detailing arthroscopy findings.

AJ Barnett, B Sheridan, J Loveridge
Title: prospective audit of procedure coding in outpatients department.
Aim: compare accuracy of HRG coding with set standard.
Outcome: Coding not performed well; has led to a change in practice in outpatient clinic.

AJ Barnett, N Obi, B Sheridan
Title: thromboembolic prophylaxis in trauma patients.
Aim: compare current VTE risk assessment form completion with set standard.
Outcome: presented at University Hospitals Bristol Orthopaedic Audit Meeting, 2010.
Initial audit revealed poor compliance completing VTE risk assessment forms. Following departmental presentation, re-audit revealed 100% compliance.

AJ Barnett, AD Taylor
Title: management of scaphoid fractures - an audit of scaphoid fracture management protocol.
Aim: compare emergency department referral pattern with agreed standard.
Outcome: presented at Bristol Royal Infirmary Orthopaedic Audit Meeting, 2003.
Patients with possible scaphoid fracture were referred to fracture clinic too early. A protocol was drawn up for the emergency department. This prevented unnecessary appointments.

AJ Barnett, B Messer, N Mather, RH Casserley.
Title: MIRCAT Study.
Aim: compare thromboprophylaxis prescription with set standard
Outcome: presented at Royal Victoria Infirmary Grand Round, Newcastle-upon-Tyne, 2001.
Highlighted deficiencies in thromboprophylaxis prescription; led to guidelines being issued and publicised throughout the hospital.
